Answer key, p. 150

**Which of the words studied in this lesson is suggested by the picture?**

**Spotlight on:** **vaccinate**—The first vaccines designed to protect us from disease were discovered by Louis Pasteur in France in 1885. He prepared a serum from cows (*vache* is the word for cow in French) and injected it into his patients. These patients did not contract smallpox, a dreaded disease that was conquered with the first vaccine.

B. And these  
write in  
letter

C.

Yes  
Answer  
this  
question, too!
